"The perfect getaway retreat should by definition be remote, smart but spartanious and surrounded by breathtaking nature. And to get your own getaway shouldn't require lifting any fingers – expect the one pointing to where you want it. "

– MORTEN BO JENSEN, CHIEF DESIGNER –

Now you can live in a Vipp...

THE VIPP SHELTER
LIVING IN A PRODUCT

Vipp has made a plug and play getaway that allows you to escape urban chaos in a 55m2 all-inclusive nature retreat.

75 years of experience with steel processing is used to craft this prefabricated object designed down to the last detail. The only choice left to the customer is where to place it. The simple steel grid structurally supports the two level space, where only the bathroom and bed loft is shielded from the main living space. Within the transparent shell, nature is omnipresent yet with a physical blindage that provides shelter from weather conditions. The recurring element of steel and the interior fitted with Vipp products ranging from hooks to lamps to kitchen convince you that you have entered a Vipp product. Like all products in the interior this construction is a tool made to accomplish something – in this case to facilitate an escape to nature. It is neither a house nor a mobile home. Rather it is spacious, functional, and livable industrial object.

– we call it The Vipp Shelter.

PRICE 485,000 € / 585,000 $
Delivery time 6 months
Installation time 3-5 days

“Each piece of interior with its predominant dark tones is carefully selected in order to keep focus on what’s important – nature.”

– MORTEN BO JENSEN, CHIEF DESIGNER –

Main open space
with Vipp kitchen island, Vipp dining table and integrated fireplace

ALL INCLUSIVE

Vipp has made a plug and play getaway that allows you to escape. The hooks, the ladder, the kitchen, the daybed, the lamps, the shelves, the towels, the toilet brush…and the list continues.

Everything you see is Vipp. And it is all inclusive. The Vipp shelter is delivered fully equipped for a total design experience and an easy escape. There is no evident link between a pedal bin, a kitchen and a shelter but enter the shelter and the philosophy of one long lasting, functional tool per category is embodied in every item you see.

ALL INCLUSIVE
KITCHEN AND DINING AREA

1 x Vipp kitchen - island & tall module

NATURE IS OMNIPRESENT

A shelter in its original sense has connotations of basic living serving a merely functional purpose and attending to our primal need of having a roof over our head.

The starting point of the Vipp shelter is going back to basics; back to nature in a dense, compact space wrapped in the Vipp DNA. The landscape is purposely framed, turning it into the predominant element of the interior space. Each piece of interior and its dominant dark tones are carefully selected in order to keep focus on nature. The sliding window frames accentuate the sensation of living in nature by blurring the distinction between indoor and outdoor space.

Dining area with unspoiled view
Nature is omnipresent with sliding panorama windows. Vipp dining table and pendant.

Surrounding nature

SHELTER FACTS

The simple steel grid structurally supports the two level space, where only the bathroom and bed loft is shielded from the main living space comprising a kitchen and relaxing area.

4 sleeping guests can stay in the shelter at the same time: 1 main bed for 2 persons in the bed loft and 2 additional persons on the daybed on the lower level.

MATERIALS
VIPP701 SHELTER

EXTERIOR

Building facade: primed and painted 2 mm / 0.08 in aluzink (stainless alloy) sheet metal;
mounted with a grid of visible screws (approx. 10.0000).

Front edge; gutter (integrated in frame) and walkway: Heat galvanized and painted steel 37.

Wall & floor construction: 0.6 mm / 0.02 in painted steel sheet metal with glass wool isolation and plywood shuttering.

Sliding glass doors: PanoramAH!, 6 units.

Skylights: Velux, integrated blinds. Remote controlled.

10 spots (LED 2 Watt), fully integrated in facade.

INTERIOR

Wall and ceiling are fitted with 3 mm / 0.1 in wool felt covered 9mm / 0.4 in plywood panels (Filzfabrik Fulda).

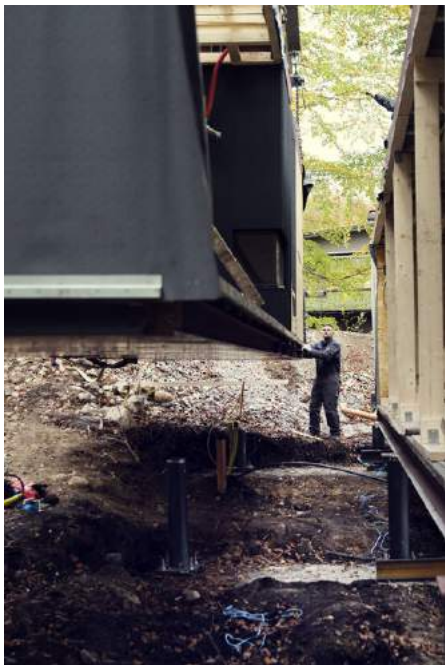
The wool felt is fire tested.

Internal ridge walls (by fireplace and in bathroom): powder coated 10x15 mm / 0.4x0.6 in aluminum
extrusion mounted onto a 1 mm / 0.04 in painted steel plate.

Floor: cast magnesite.

Bathroom ceiling: polished stainless steel.

Specially designed ladder
to upper level sleeping area



A PLUG AND PLAY GETAWAY

The vision is to simplify the process of creating your own getaway. When buying the Vipp shelter you buy into a design approach.

Design choices have already been made based on a long experience within processing of solid materials with a defined aesthetic idiom. Designers and engineers have made the necessary deselections and defined the construction and material requirements. We exploit the benefits of a pre-fabrication allowing the process to be easy, speedy and cost-efficient. Production takes place in Frederiksværk, Denmark and is estimated to approximately 5-6 months + freight & installation (from order confirmation). Delivery time varies according to location. Installation will take between 3-5 days.

The point of departure is not a piece of land on which a house has been customized taking into consideration the natural surroundings. Rather the Vipp Shelter is prefabricated and built to fit any type of landscape and natural conditions.

SEEKING SHELTER?
HOW TO GET YOUR OWN

Dreaming of getting your own getaway while saving time and trouble in the process? Our ready-to-go-home might be the solution. Here is how to proceed in 3 steps:

01 — FIND YOUR PIECE OF LAND

In the darkest forest or in the brightest desert

The Vipp shelter is prefabricated and built to fit any type of landscape and natural conditions including heavy snow load. We suggest you find a local contractor that can confirm site compliance to our technical guidelines describing size & weight, foundation, requirements for water, sewage & electricity, site access, isolation, mounting & fitting.

02 — WE DELIVER & INSTALL

Just tell us where and when

Consider the Vipp shelter as a finished product. This means that you cannot alter the design of the shelter. Vipp delivers a completely finished design product where production will take up to 6 months and installation is done within 3-5 days. Vipp takes care of freight and installation of the shelter with our own crew in collaboration with your local contractor.

03 — GRAB YOUR WEEKEND BAG AND ESCAPE

Everything else is taken care of

The Vipp shelter is fully equipped with interior, so grab your iPad and a weekend bag. That is all you need to escape to the Vipp shelter. Everything else is taken care of: furniture, lighting, tableware, towels and even bed linen are included in the shelter allowing you an easy escape.
