# P

ph 5 – contemporary

An iconic light design which has remained contemporary and popular because the past constantly communicates in harmony with the future.

## an icon in new colours

A classic, aesthetic colour palette in balanced hues. PH 5 in new colours glides into modern interiors in a discreet and exclusive way, with a soft feminine or tough masculine profile which visually enhances contemporary home furnishings.

# P

play with colours

Available in these colour combinations: Rose/Green, White/Rose, Dark grey/Turquoise, Army green/Dark grey. PH 5 thus becomes the light for everyone – whether you like quiet classic, vibrant bold, or balanced contemporary style. Fixture dimensions: Ø 500 mm, H: 285 mm.

## contrast

Raw, matt and slightly brutal. A powerful presence.  
An appealing, dominating form, because the contrasts  
remove anonymity.

# O

opposites meet

Mix the lights freely. The courage and will to think differently often leads to surprising results.

Soft feminism interacting with masculinity blends in attractively in a mixed interior, and a fellowship arises from the contrasts.

## challenge

Versatility and great adaptability to all forms of interior design have characterised many of Poul Henningsen's products. A unique design interplays harmoniously with everything from marble to sanded doors. With tranquility and dignity. The simple shape of PH 5 makes it suited to any furnishing context. Irrespective of colour, PH 5 retains its unique light distribution and thereby helps create a central bright point in any design arrangement.

## elegance

Elegant, delicate atmosphere. The combination of rose and green results in a beautiful soft mood combined with freshness and purity.

Delicate hues soften up a rigid design, adding a gentle counterpart to the environment, which helps create a calm balance between the many objects and details.
