MINDO COLLECTION 2025/26 - Design Denmark

## Who is mindo?

- mindo is a Danish outdoor furniture brand with a strong commitment to eco-responsibility
- Collections are created in collaboration with renowned European designers
- All materials used are recyclable and of high-quality to craft durable, long-lasting products
- With decades of experience, mindo combines design expertise and production know-how
- mindo's own state-of-the-art, highly automated production facility ensures consistent quality
- Every piece is carefully inspected by mindo's skilled team before leaving the production facility.

*"At mindo, we believe great design should be lived with and enjoyed every day. This collection has been curated in close collaboration with our designers and our friends in New Zealand, reflecting both functionality and a dedication to quality materials. We are delighted to share it with you and look forward to seeing how it enhances your guests' experience."*

**Thomas Overby Andersen, CEO at mindo**

## Why are materials so important for mindo?

- mindo takes pride in carefully selecting the best suppliers for every material used
- Material suppliers are leading global innovators, known for their quality, responsibility, and expertise
- All material suppliers must embrace strict environmental standards to ensure sustainable practices
- Whenever possible, locally sourced and produced materials are chosen to reduce cost, waste, and lead times - benefiting both mindo's customers and the environment
- mindo offers a two-year warranty on all products from date of purchase.

## Frames

- All frames are made of high grade, powder-coated aluminium
- Solvent-free powder-coating from Austrian Tiger
- Aluminium is ideal for outdoor use as it is resistant against corrosion
- As a material, aluminium has a very high longevity and is considered indefinitely recyclable.

## Rope

- Made from 100% solution-dyed polypropelene
- Resistant to sunlight, chlorine, sunscreen lotion and dirt due to special spinning process that adds UV-protection and antioxidants to the fibers
- Lives up to Oeko-tex Standard 100
- Special, soft "wool-like" feel & touch.

## Fabrics

- Fabrics are manufactured by renowned suppliers, i.e. Sunbrella or using high-quality Olefin yarns
- High-quality, extreme weather resistance and special anti-mould properties define all fabrics used by mindó
- All upholstered furniture can be left out during the entire summer due to their UV-resistant qualities and the usage of a water-repellent inner lining
- Rainwater does not soak into fabrics and can be brushed off for quicker drying.

# mindo 101

- 5 table models and 2 chair models in 2 colour options
- Mix of cool and warm materials: ceramics, aluminium, teak, and rope
- Stackable lounge and dining chairs
- Certified plantation teak slats are individually replaceable
- Sculpted backrest offers comfort and support in varied positions
- Smooth design with no sharp edges.

*"The mindo 101 chair is the result of a big dream and a lot of passion. We went back and forth, tweaking even the smallest details, and pushing each other creatively. It was truly a collaborative effort between the talented craftsmen, mindo and myself. It's the kind of design that comes from challenging the process and putting in the work."*

**Thomas E. Alken, Designer**

# mindo 102

- Multiple table sizes and materials options
- 2 colour choices
- Aluminium with certified plantation teak or high-pressure laminate (HPL) tabletops
- Ergonomically shaped seat for comfort
- Individually replaceable teak slats for lasting durability
- Untreated teak naturally ages to a silvery-grey finish
- Smooth design with no sharp edges.

*"When on the go or to break away from a traditional outdoor dining setting, I prefer the relaxed and versatile bar table and chair. Elevating myself above standard table height provides a new perspective on my surroundings. When time is short, it's a less formal way to enjoy a quick espresso on the terrace."*

**Thomas E. Alken, Designer**

# mindo 104

- Sculptural, eye-catching design
- 4 colour choices
- Powder-coated aluminium
- Lightweight with practical handle for easy handling
- Organic, rounded form
- Removable tray
- Ideal companion for indoor and outdoor use.

*"This table is all about organic, smooth curves - from the handle to the removable top, every line is gentle. Even the way the light plays on its surface gives it a soft, sculptural feel. The removable top bridges the gap between inside and outside, adding a touch of functionality to its beauty."*

**Thomas E. Alken, Designer**

# mindo 105

- Minimalist, lightweight lounge chair with a distinctive design in 2 colour choices
- Powder-coated aluminium frame with special sling fabric "Batyline Eden" by French Serge Ferrari
- Robust, yet airy material with a soft, wool-like touch
- Ideal for pools and spas in hospitality settings as it is low maintenance and durable, as well as mold and UV-resistant
- Stays cool in direct sun and dries quickly after getting wet.

*"I like the unpretentious nature of the lounge chair, very laid-back. We worked hard on the design, on details that are practically invisible but contribute greatly to the success. A vital detail is the slightly curved diagonal aluminium profile to strengthen the frame."*

**Thomas E. Alken, Designer**

# mindo 108

- Versatile poufs in 2 sizes and 4 colour options
- Easy to move, yet sturdy enough for extra seating in lounge and dining areas
- Sunbrella and Olefin fabric combination
- Quick-dry foam on a durable aluminium frame for weather resistance
- Simple design fits both indoor and outdoor settings.

*"I wanted the poufs to feel playful and engaging - like dependable companions. They're mobile, adaptable, and built to be as strong as they are versatile and light. The fabric and colour combinations are tactile and can either stand out or blend in depending on the surroundings."*

**Rikke Frost, Designer**

# mindo 119

- Classic outdoor dining chair with refined detailing
- Powder-coated aluminium frame with certified plantation teak
- Designed for longevity – all teak components are individually replaceable
- Stackable armchair for easy storage.

*"I've learned from experience that simple things take time. With this chair, I am trying to combine classic lines with a modern twist, but never compromising on comfort or functionality. Details like the armrest give the chair its uniqueness."*

**Thomas E. Alken, Designer**

# mind0122

- Tailored sofa from high-quality materials
- Powder-coated aluminium frame with rope sides and cushions in 100% Olefin yarn
- Precision-engineered design: each layer is removable and replaceable, with zip-fastened sides expertly integrated beneath the frame
- This level of detailing reflects both design and production expertise
- Soft, timeless aesthetic suited for both indoor and outdoor spaces
- Memory foam layer enhances seating comfort

*"This collection is about precision and purpose - each component fitting seamlessly to create adaptable, enduring lounge furniture that stays with you for the long run. The concept of tailoring to the frame and working in layers has so much potential and we're only at the beginning."*

**Thomas E. Alken, Designer**

# mindo 124

- Constructed entirely from 100% powder-coated aluminium
- Removable backrest and seat for extended product lifespan
- Suitable for both hospitality projects and residential use
- All models stack upright for efficient storage
- Optional cushions with quick fastening & release underneath the seat
- Easy assembly with all hardware and tools included
- Low-maintenance and built to last.

*"For this collection, I worked closely with the production engineers, balancing my design with their goal for a smart, efficient production while always keeping quality intact. I really enjoyed the challenges we solved together even though we were miles apart."*

**Jesper K. Thomsen, Designer**
